|                                                                                                                                                                                                                                                                                                                                                          | How many in all?    | (¿cuántos hay en total?) | asks for the total amount           |

# Let's solve a problem!

Louisa has 4 apples.  
Her friend gives her  
**5 more apples.**

**How many apples  
does she have in all?**

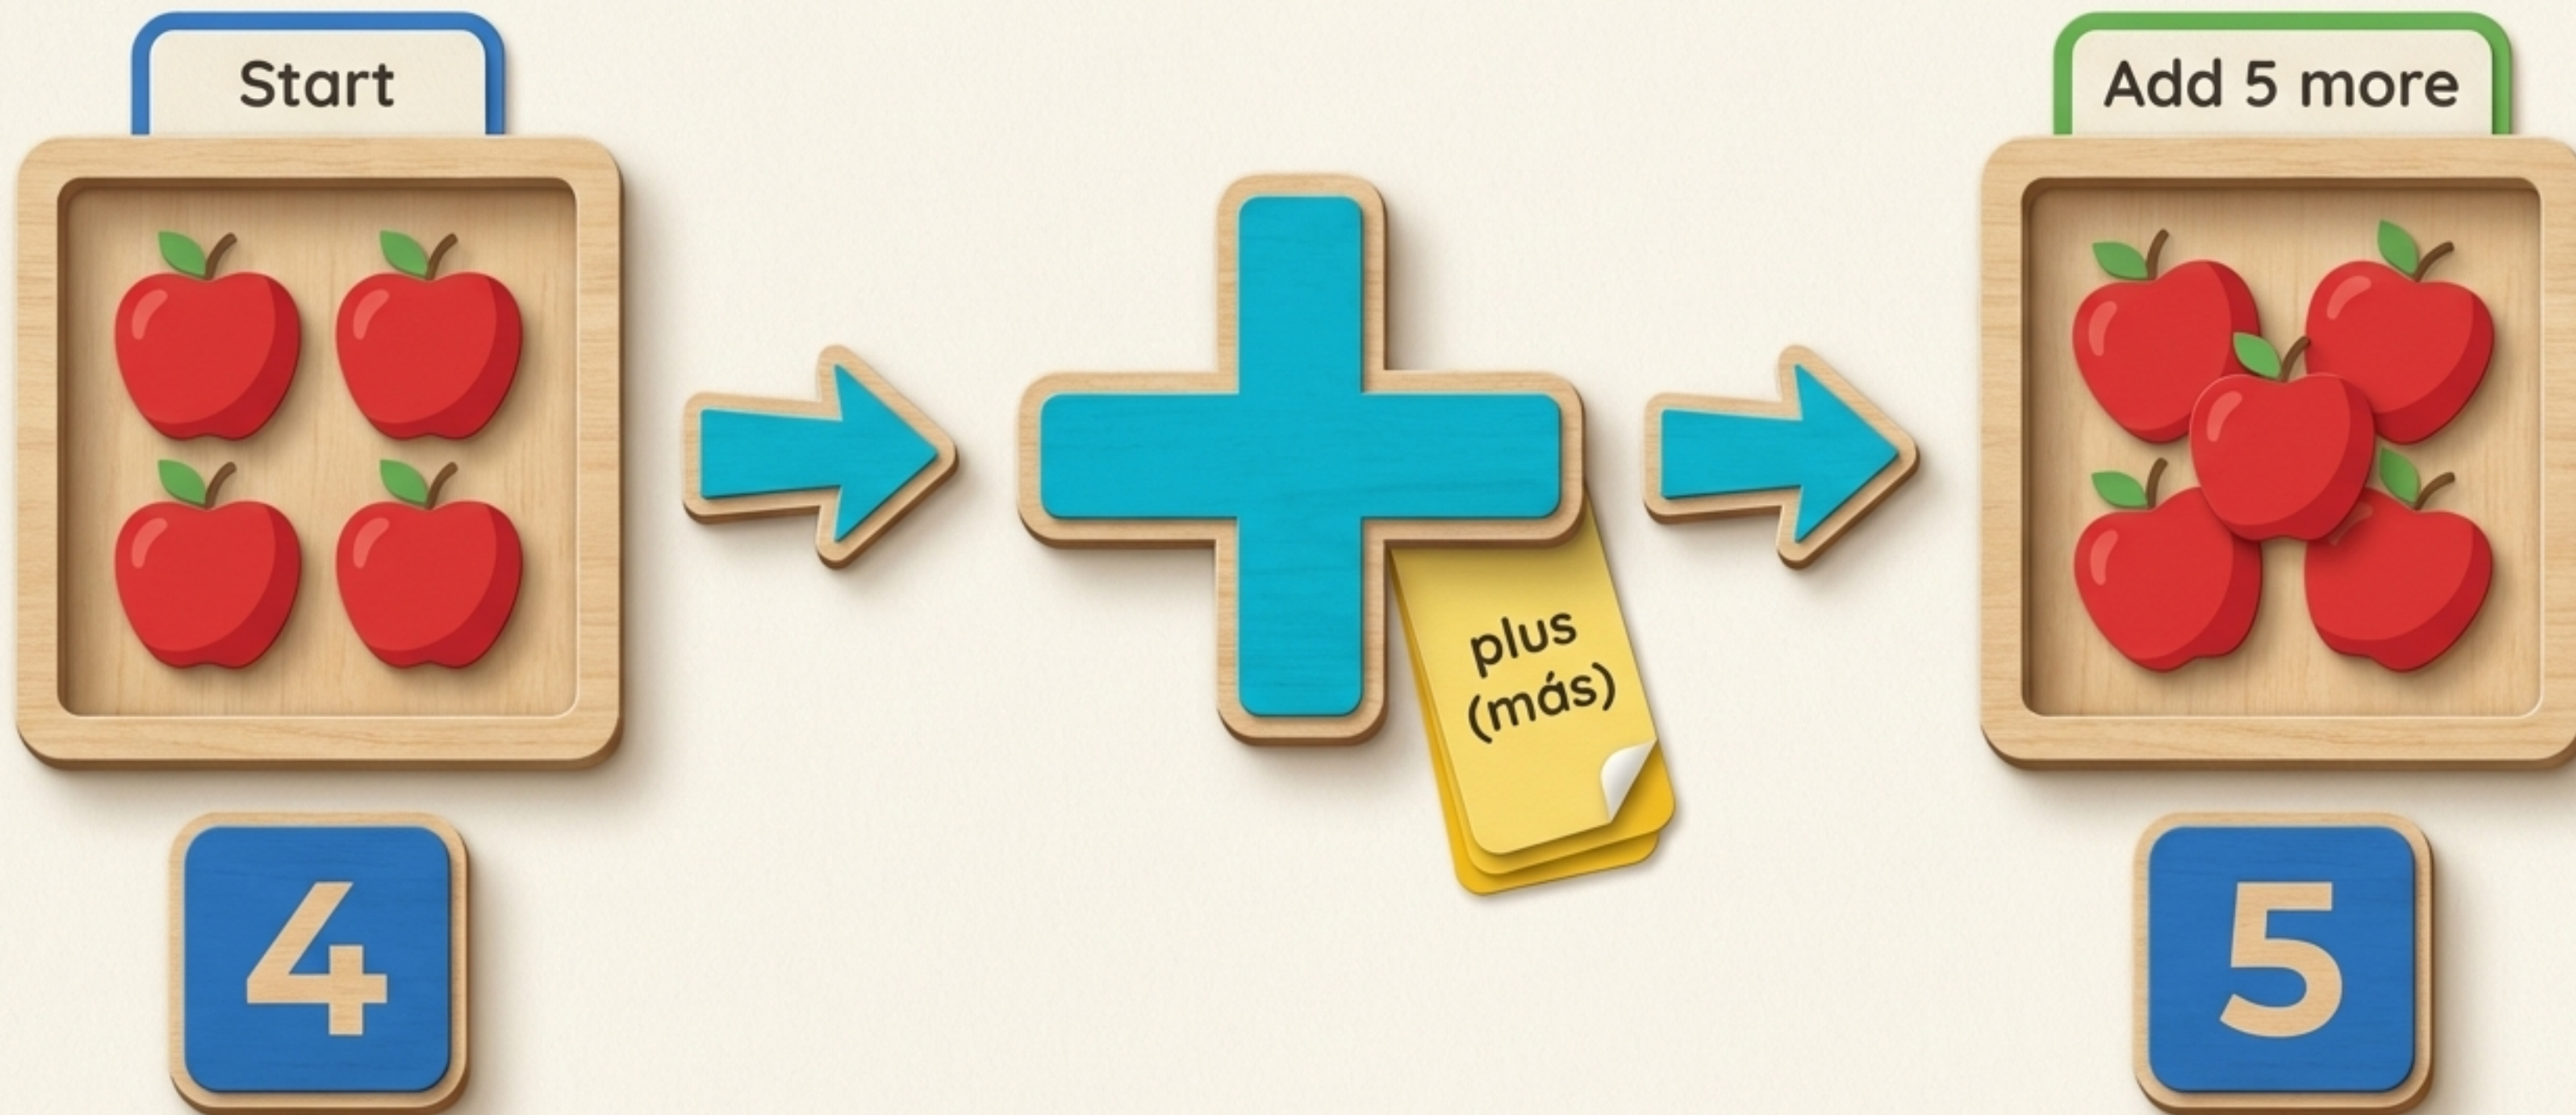

**add**  
(añadir)

**How many  
in all?**  
(¿cuántos hay  
en total?)

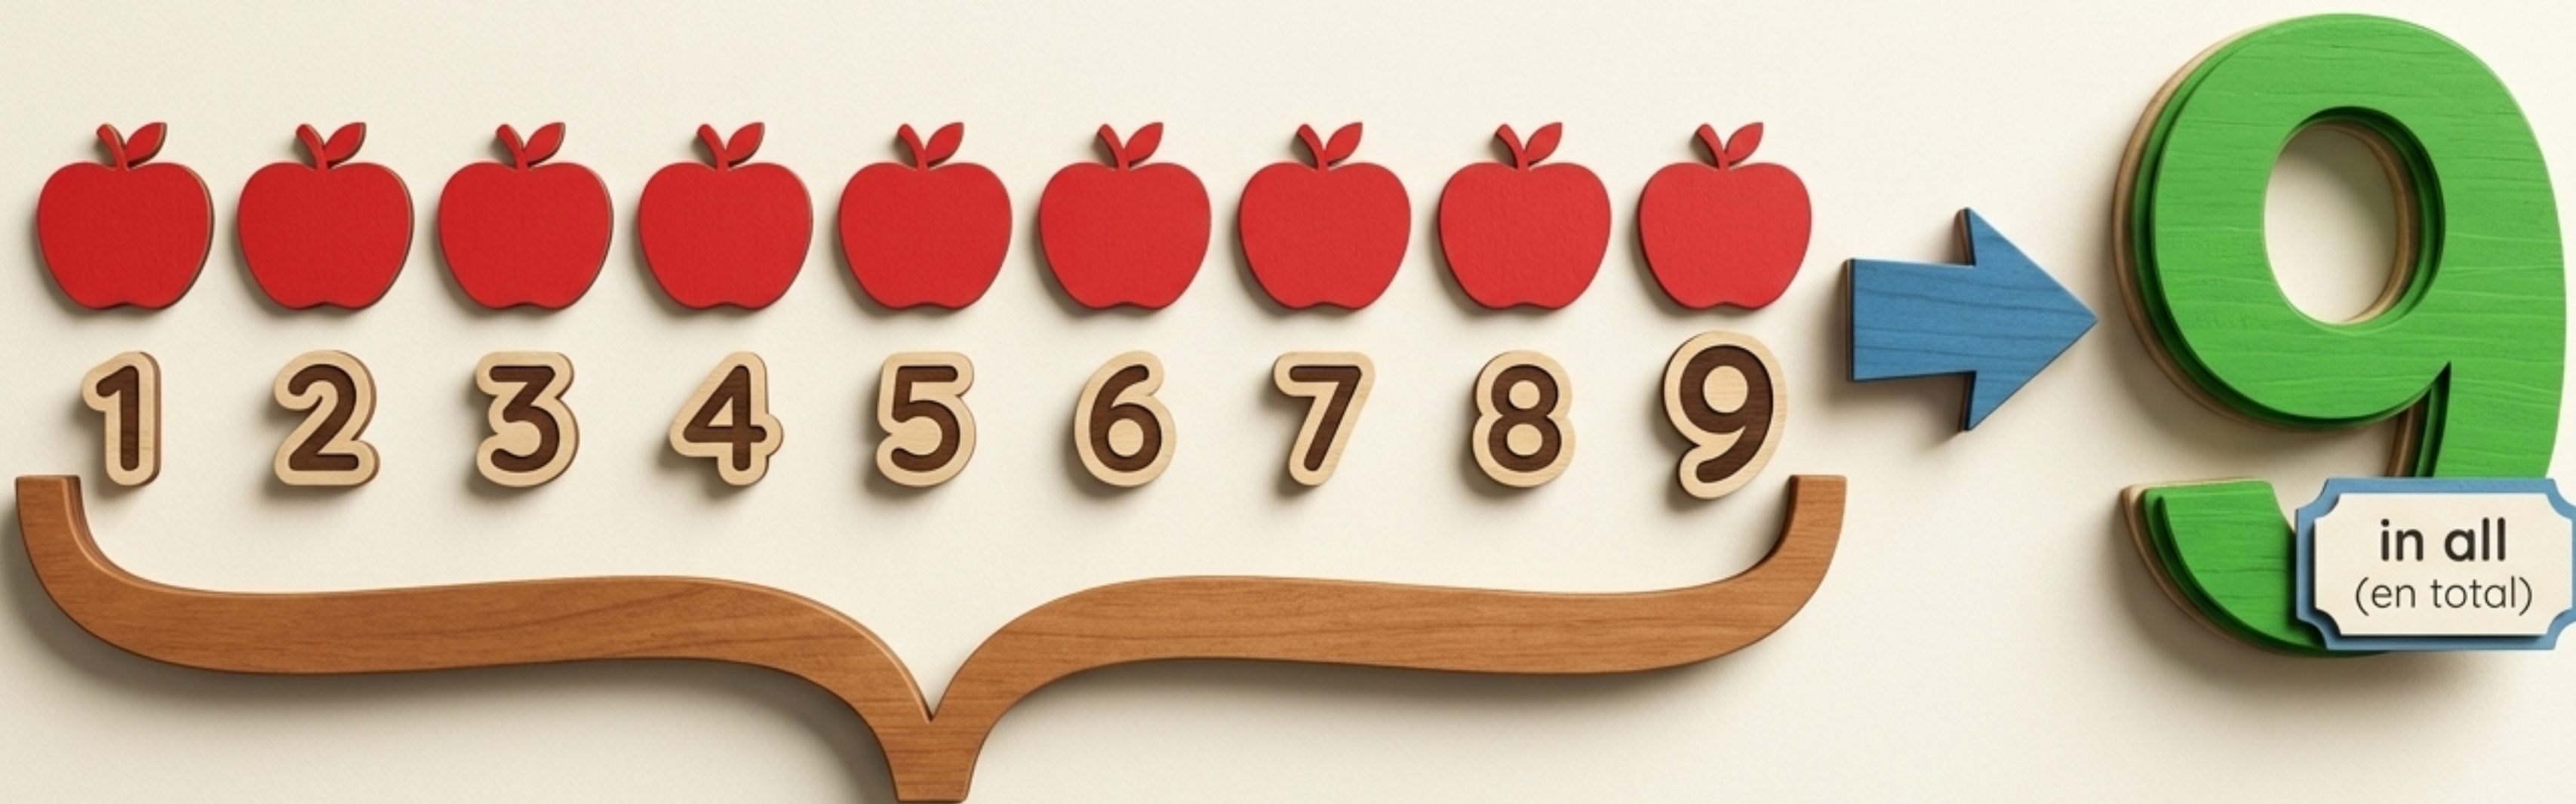

# Building the Equation

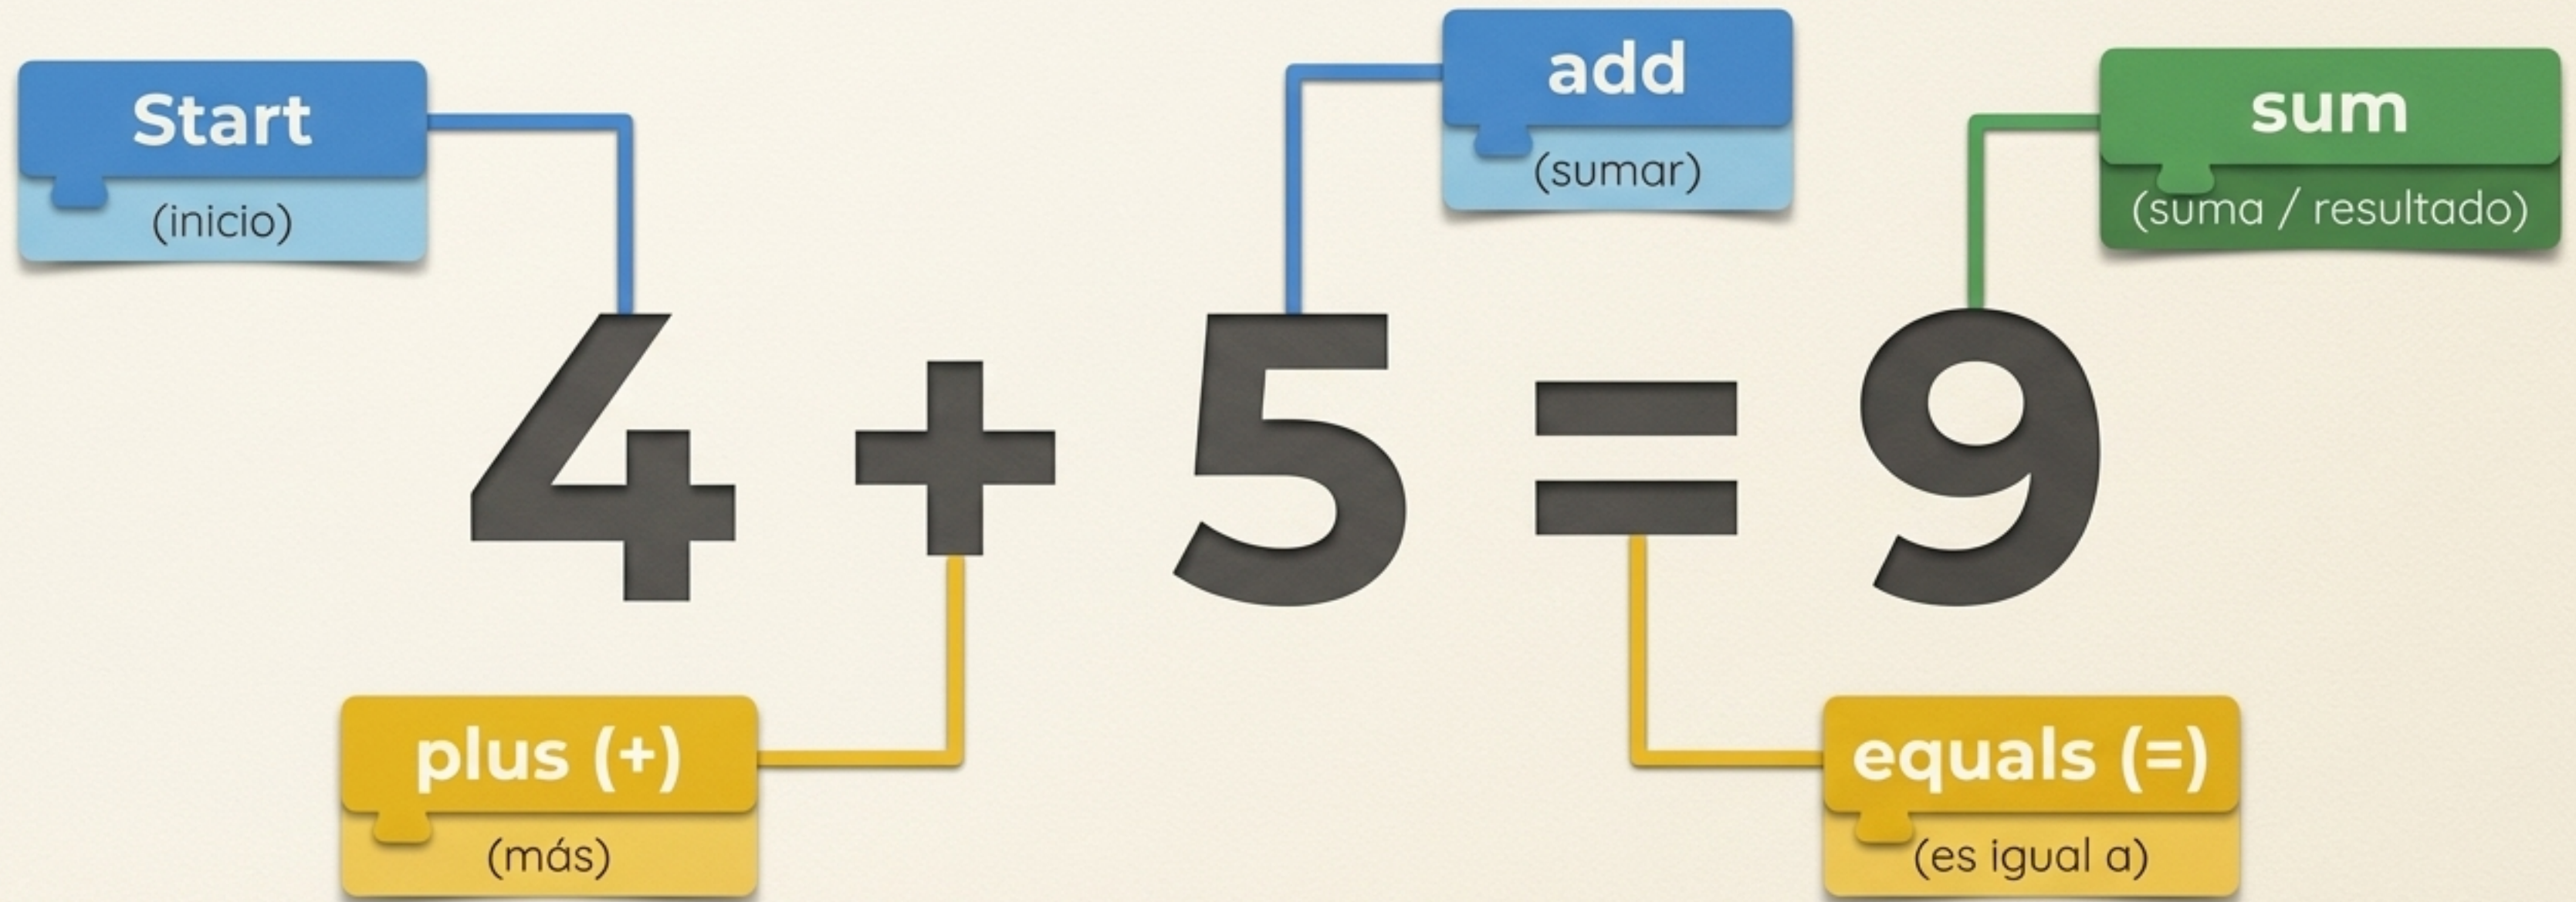

# Count all the apples together

# The Final Answer

**Answer: Louisa has nine apples in all.** 🍏 ✨
