

Foundations of Subtraction

Fundamentos de la Resta

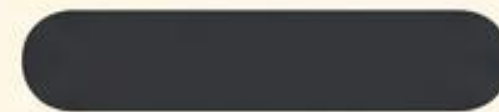

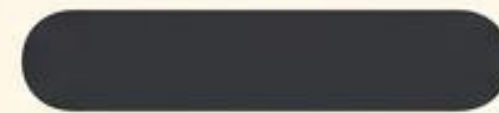

minus

it tells us to take away

(menos)

equals

shows that two
amounts are the same

(es igual a)

The Actions Las Acciones

take away

to remove or take something
from a group
(quitar)

subtract

to take one number away
from another
(restar)

The Outcomes Los Resultados

difference

the answer in a subtraction
(resultado / diferencia)

left

what remains after taking away
(queda / restante)

How many are left?

asks for the remaining amount
(¿cuántos quedan?)

Let's solve a problem!

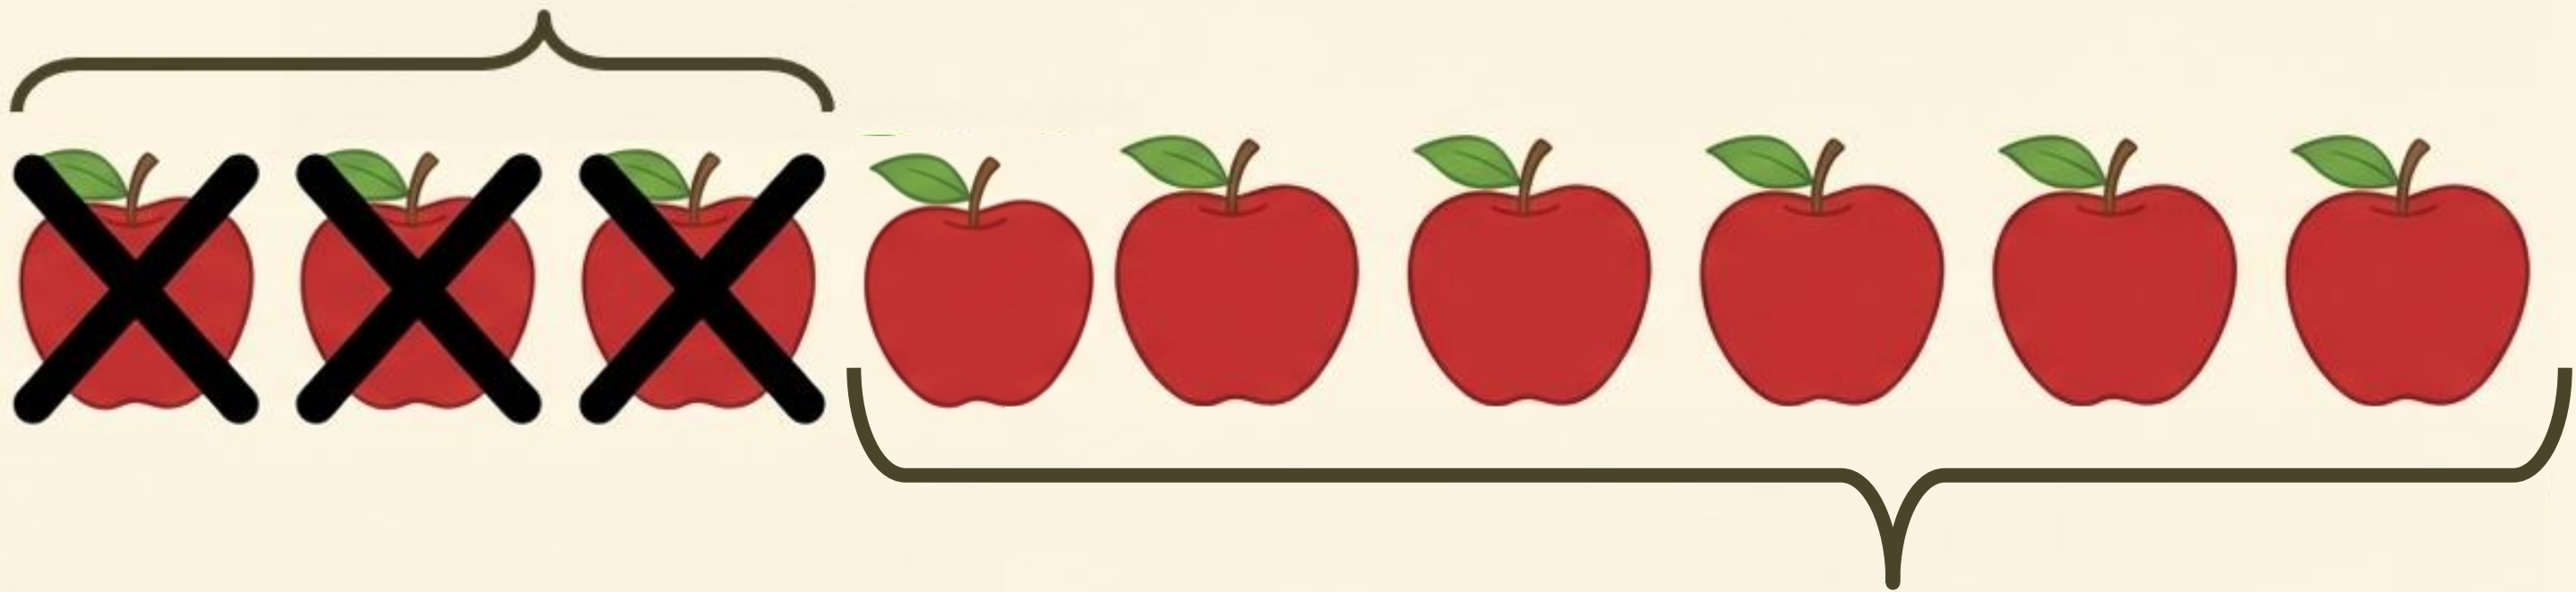

Louisa has 9 apples. She was hungry,
so she ate 3 apples.

How many apples are left?
(¿cuántos quedan?)

1. Start with 9

2. Take away 3

3. Count what is left

6

Start with 9
(The initial group)

9 - 3 = 6

minus
(menos)

subtract
(restar)
Take away 3

equals
(es igual a)

difference
(diferencia)
what is left / (queda)

4. So $9 - 3 = 6$. **Answer: There are six apples left.**
