

SUBTRACTION 1°

SUBTRACTION - PRACTICE exercises

exercise 1

$$\begin{array}{r|l} \text{T} & 0 \\ 5 & 8 \\ - 3 & 5 \\ \hline \end{array}$$

1. IF IT IS EASIER FOR YOU, YOU CAN JUST REPRESENT THE NUMBER. REMEMBER, YOU ONLY NEED TO REPRESENT THE NUMBER ON THE TOP BECAUSE YOU ARE GOING TO SUBTRACT.

2. NOW START WITH THE ONES. ON TOP YOU HAVE 8, WHICH MEANS YOU NEED TO SOLVE 8 MINUS 5. DO YOU HAVE ENOUGH ONES TO TAKE AWAY 5?

Yes! LOOK:

$$\text{SO... } 8 - 5 = 3$$

$$\begin{array}{r|l} \text{T} & 0 \\ 5 & 8 \\ - 3 & 5 \\ \hline & 3 \end{array}$$

3. CONTINUE WITH TENS. ON TOP YOU HAVE 5, WHICH MEANS YOU NEED TO SOLVE 5 MINUS 3. DO YOU HAVE ENOUGH TENS TO TAKE AWAY 3?

Yes! LOOK:

$$\begin{array}{r} \text{T} \quad 0 \\ 58 \\ - 35 \\ \hline 23 \end{array}$$

SO... $5 - 3 = 2$

4. FINALLY, THE ANSWER IS 23:

$$\begin{array}{r} \text{T} \quad 0 \\ 58 \\ - 35 \\ \hline 23 \end{array}$$

exercise 2

$$\begin{array}{r|l} \text{T} & 0 \\ & 9 \ 3 \\ - & 9 \ 1 \\ \hline \end{array}$$

1. REPRESENT THE NUMBER. REMEMBER, YOU ONLY NEED TO REPRESENT THE NUMBER ON THE TOP BECAUSE YOU ARE GOING TO SUBTRACT.

2. NOW START WITH THE ONES. ON TOP YOU HAVE 3, WHICH MEANS YOU NEED TO SOLVE 3 MINUS 1. DO YOU HAVE ENOUGH ONES TO TAKE AWAY 1?

YES! LOOK:

SO... $3 - 1 = 2$

$$\begin{array}{r|l} \text{T} & 0 \\ & 9 \ 3 \\ - & 9 \ 1 \\ \hline & 2 \end{array}$$

3. CONTINUE WITH TENS. ON TOP YOU HAVE 9, WHICH MEANS YOU NEED TO SOLVE 9 MINUS 9. DO YOU HAVE ENOUGH TENS TO TAKE AWAY 9?

YES! LOOK:

SO... $9 - 9 = 0$

$$\begin{array}{r|l} T & 0 \\ 9 & 3 \\ - 9 & 1 \\ \hline 0 & 2 \end{array}$$

4. FINALLY, THE ANSWER IS 2:

$$\begin{array}{r|l} T & 0 \\ 9 & 3 \\ - 9 & 1 \\ \hline 0 & 2 \end{array}$$

exercise 3

$$\begin{array}{r|l} \text{T} & 0 \\ 4 & 3 \\ - 2 & 7 \\ \hline \end{array}$$

1. REPRESENT THE NUMBER. REMEMBER, YOU ONLY NEED TO REPRESENT THE NUMBER ON THE TOP BECAUSE YOU ARE GOING TO SUBTRACT.

2. NOW START WITH THE ONES. ON TOP YOU HAVE 3, WHICH MEANS YOU NEED TO SOLVE 3 MINUS 7. DO YOU HAVE ENOUGH ONES TO TAKE AWAY 7?

... NO, YOU DON'T HAVE ENOUGH ONES, SO YOU NEED TO **regroup**. THIS MEANS TAKE A TEN AND BREAK IT INTO ONES.

LIKE THIS:

BEFORE

AFTER

- a. NOW, HOW MANY ONES DO YOU HAVE IN ALL?
13 SO THE NUMBER 3 BECAME IN 13, BECAUSE NOW YOU HAVE 13 ONES

$$\begin{array}{r|l}
 \text{T} & 0 \\
 & \textcolor{red}{13} \\
 4 & \textcolor{red}{3} \\
 - 2 & 7 \\
 \hline
 \end{array}$$

AND BECAUSE WE TAKE ONE TEN AND BREAK IT INTO ONES, NOW WE HAVE ONLY THREE TENS. SO THE 4 TENS BECOMES A 3 TENS:

$$\begin{array}{r|l}
 \text{T} & 0 \\
 & \textcolor{red}{13} \\
 \textcolor{red}{3} & \textcolor{red}{3} \\
 \textcolor{red}{4} & \textcolor{red}{3} \\
 - 2 & 7 \\
 \hline
 \end{array}$$

B. NOW YOU HAVE ENOUGH ONES TO TAKE AWAY 7, DO IT:

SO... $13 - 7 = 6$

$$\begin{array}{r|l}
 \text{T} & 0 \\
 & 13 \\
 3 & \textcolor{red}{3} \\
 \textcolor{red}{4} & \textcolor{red}{3} \\
 - 2 & 7 \\
 \hline
 & \textcolor{red}{6}
 \end{array}$$

3. CONTINUE WITH TENS. ON TOP YOU HAVE 3, WHICH MEANS YOU NEED TO SOLVE 3 MINUS 2. DO YOU HAVE ENOUGH TENS TO TAKE AWAY 2?

YES! LOOK:

So... $3 - 2 = 1$

$$\begin{array}{r|l} T & 0 \\ 3 & 13 \\ \cancel{4} & \cancel{3} \\ - 2 & 7 \\ \hline \textcircled{1} & 6 \end{array}$$

4. Finally, the answer is 16:

exercise 4

$$\begin{array}{r|l} \text{T} & 0 \\ & 52 \\ - & 29 \\ \hline \end{array}$$

1. REPRESENT THE NUMBER. REMEMBER, YOU ONLY NEED TO REPRESENT THE NUMBER ON THE TOP BECAUSE YOU ARE GOING TO SUBTRACT.

2. NOW START WITH THE ONES. ON TOP YOU HAVE 2, WHICH MEANS YOU NEED TO SOLVE 2 MINUS 9. DO YOU HAVE ENOUGH ONES TO TAKE AWAY 9?

... NO, YOU DON'T HAVE ENOUGH ONES, SO YOU NEED TO **regroup**. THIS MEANS TAKE A TEN AND BREAK IT INTO ONES.

LIKE THIS:

BEFORE

AFTER

- a. NOW, HOW MANY ONES DO YOU HAVE IN ALL?
12 SO THE NUMBER 2 BECAME 12, BECAUSE NOW YOU HAVE 12 ONES

	T		0
			12
	5		2
—	2		9

AND BECAUSE WE TAKE ONE TEN AND BREAK IT INTO ONES, NOW WE HAVE ONLY FOUR TENS. SO THE 5 TENS BECOMES 4 TENS:

	T		0
	4		12
	5		2
—	2		9

B. NOW YOU HAVE ENOUGH ONES TO TAKE AWAY 9, DO IT:

SO... $12 - 9 = 3$

	T		0
	4		12
	5		2
—	2		9
			3

3. CONTINUE WITH TENS. ON TOP YOU HAVE 4, WHICH MEANS YOU NEED TO SOLVE 4 MINUS 2. DO YOU HAVE ENOUGH TENS TO TAKE AWAY 2?

YES! LOOK:

SO... $4 - 2 = 2$

$$\begin{array}{r} \text{T} \quad 0 \\ 4 \quad 12 \\ \cancel{5} \quad \cancel{2} \\ - \quad 2 \quad 9 \\ \hline \quad 2 \quad 3 \end{array}$$

4. FINALLY, THE ANSWER IS 23:

$$\begin{array}{r} \text{T} \quad 0 \\ 4 \quad 12 \\ \cancel{5} \quad \cancel{2} \\ - \quad 2 \quad 9 \\ \hline \quad 2 \quad 3 \end{array}$$
